

KEYUR MEHTA

Solution Architect | Mobile, Web, Cloud & AI-Enabled Platforms

Ahmedabad, Gujarat, India | [+91 94272 33749](tel:+919427233749) | ksmehta2004@gmail.com | linkedin.com/in/keyur-mehta-39699836 | github.com/Mehta2015 | keyurmehta.in/projects

PROFESSIONAL SUMMARY

- 17+ years in software engineering, including 12+ years in solution and platform architecture; designed and delivered 50+ solutions spanning mobile, web, and cloud-integrated systems across fintech, IoT, media streaming, enterprise, and digital commerce.
- Architected end-to-end platforms combining native mobile clients (Flutter, Kotlin/Jetpack Compose, SwiftUI, React Native) with backend and API architecture (Node.js, REST, GraphQL) and cloud infrastructure (AWS, Azure), beyond the mobile layer.
- Drive technical presales, solution consulting, and architecture reviews for enterprise clients, translating business requirements into HLDs, LLDs, and cross-platform technology roadmaps.
- Daily user of AI-assisted development tools for code generation, debugging, code review, and large-codebase navigation; led adoption of AI-driven engineering workflows across teams.
- Led cross-functional teams of 50+ engineers across architecture, backend, QA, and DevOps, standardising engineering governance, CI/CD automation, and mobile security practices adopted across multiple teams.
- Delivered a 4x improvement in deployment frequency and a 35% performance gain through architecture modernisation, CI/CD automation, and observability-driven engineering.

CORE COMPETENCIES

Solution & Enterprise Architecture: Solution Architecture, Technical Presales & Solutioning, HLD/LLD Design, Enterprise Integration, Technology Roadmap Planning, Stakeholder Management

Mobile Engineering: Flutter (Cubit/Clean Architecture), Android (Jetpack Compose, MVVM, Hilt), iOS (SwiftUI, MVVM-C), React Native, Kotlin Multiplatform, Java

Web & Backend Architecture: Node.js, REST & GraphQL API Design, API Integration, WebSockets, Event-Driven Systems, Microservices, API Gateway Pattern

Cloud & DevOps: AWS (EC2, S3, CloudFront, Cognito, IAM), Azure (DevOps, App Service), CI/CD (GitHub Actions, Bitbucket, Bitrise, Codemagic, Fastlane)

AI-Assisted Engineering: AI Coding Agents, AI-Assisted Debugging & Refactoring, Code Review Automation, Prompt-Driven Development Workflows

Security & Quality: OWASP MASVS, SSL Pinning, App Signing, Mobile Security Auditing, Scalability, Caching, High Availability, Observability

Databases: MySQL, PostgreSQL, MongoDB

Leadership: Technical Leadership, Team Mentorship, Agile Delivery, Technical Governance

PROFESSIONAL EXPERIENCE

Senior Technical Architect — Brainvire Infotech Pvt. Ltd.

04/2015 – Present

Ahmedabad, India

- Lead architecture design and technical strategy for enterprise-grade platforms spanning mobile (Flutter, Android, iOS), backend/API layers (Node.js, REST, GraphQL), and cloud-integrated systems across fintech, IoT, media streaming, and digital commerce.
- Use AI coding agents daily to accelerate debugging, navigate large codebases, prototype architectural changes, and review code for quality and security; document findings and share reusable prompt patterns with engineering teams.
- Define and standardise HLDs, LLDs, deployment architectures, integration workflows, and non-functional requirements across mobile, web, and backend systems.
- Established CI/CD pipelines (GitHub Actions, Bitbucket, Fastlane, Azure DevOps) and release automation strategies, reducing release time from 2 days to 2 hours and improving deployment frequency by 4x.

- Mentor 50+ engineers across mobile, web, DevOps, and AI-assisted development practices; lead mobile security auditing (OWASP MASVS, SSL pinning) and architecture reviews.
- Collaborate with C-level stakeholders, product owners, and global clients to define technology roadmaps aligned with business objectives.

Android Developer — Abbacus Technologies

12/2013 – 04/2015

Ahmedabad, India

- Developed Android applications using Java for eCommerce, social networking, and booking platforms.
- Collaborated with cross-functional teams on requirement analysis, planning, and technical implementation to deliver scalable, user-friendly solutions.

Independent Software Developer — Self-Employed

2012 – 2013

- Built and delivered mobile application projects for clients on a freelance basis, covering requirement analysis, development, and deployment.

Project Intern — Cygnet Infotech

08/2011 – 08/2012

- Developed enterprise applications using J2EE technologies (EJB, Servlets); supported backend module development and application integration.

Independent Software Developer — Self-Employed

2009 – 2010

- Delivered freelance web and application development projects for clients using ASP.NET and front-end technologies, prior to pursuing postgraduate studies.

Project Intern — Innova System Pvt. Ltd.

11/2008 – 05/2009

- Built applications using ASP.NET, HTML, and CSS; assisted with application enhancement and frontend implementation.

SELECTED PROJECT EXPERIENCE

Fintech Platform Architecture (Mobile + Backend)

- Architected secure payment, account management, and real-time transaction tracking solutions, including native mobile clients and backend/API integration workflows; designed event-driven API integrations to improve transaction reliability and responsiveness.

Backend & API Architecture (Node.js / GraphQL)

- Designed backend service and API architecture (Node.js, REST, GraphQL) powering mobile client applications, defining data contracts, authentication flows, and integration patterns between mobile and backend teams; deployed on AWS.

Media Streaming Platform

- Architected a media streaming platform with smart TV casting and HLS streaming support for 30K+ monthly active users; reduced video startup latency by 30%.

IoT Platform Architecture

- Designed IoT-enabled solution architecture integrated with AWS to support scalable, reliable device communication across mobile and backend services; improved observability and reduced incident resolution time by 40%.

Enterprise Platform Modernization

- Led architecture and optimisation of enterprise applications focused on scalability, maintainability, and performance; standardised reusable architecture patterns across mobile and web projects.

EDUCATION

Master of Technology (M.Tech) — International Institute of Information Technology (IIT), Pune

2010 – 2012

Bachelor of Engineering (B.E.) — Bhavnagar University

2005 – 2009

LANGUAGES

English, Hindi, Gujarati
